

District 11's International Charity 2021-22 Child Hope have recently launched their
GIRLS IN SCHOOL APPEAL

They hope to raise £5000 to ensure that girls can continue going to school during their period

One of the barriers girls face in getting an education has become known as 'period poverty'. It refers to a limited or lack of access to safe period products, adequate menstrual education, and safe water, sanitation and hygiene facilities.

In Nepal, many girls from low-income families confront this barrier and end up dropping out of school due to the cost of safe sanitary products, cultural taboos, inaccurate information and education on menstrual health, and insufficient washing facilities and mixed toilets in schools.

Together with Child Hope's partner Voice of Children, they are working with schools in Nepal to address the barriers girls face in getting an education.
